# MESSAGE FROM THE CHAIR

Assalamu'alaykum (Peace be with you)

Ramadan Mubarak from myself and everyone at Drop of Compassion! May Allah (SWT) grant us all the ability to make the most of this blessed month.

The Objective of this month is to strengthen our bond With Allah (SWT) through fasting, praying and giving in charity.

In our 10th anniversary year we would like to acknowledge how through your generosity and financial support, the charity has continued to empower people across the globe. We have now achieved 64 Irrigation schemes in Malawi which will allow thousands of people to become self sustainable. We have also developed a water filtration plant in Bangladesh which will give access to clean water to over 250 thousand people and further supported a village in Pakistan with a water filtration plant.

Furthermore, our 4 Community Hubs continue to provide access to schooling, Islamic education, health clinics, farming and various other long term sustainable projects which all continue to empower women and children.

As you know we have had the devastating earthquake in Turkey and Syria as well as a Cyclone in Malawi. Drop of Compassion intends to provide both Short term and long term support in both of these areas.

Drop of Compassion runs a number of charity programmes with a 100% Donation promise, I ask that you give generously this month to gain immeasurable reward and save countless lives. Please donate your sadaqah and zakat and help us to REACH, GIVE, SHARE and EMPOWER as many families as possible.

Jazak'Allah Khair for all your amazing support – may Allah (SWT) accept your worship and good deeds, and may He continue to bless you and your family, Ameen.

Your brother in Islam and humanity,

Ismail Yusuf Patel (Chair of Trustees)

# WHO WE ARE

Drop of Compassion was set up in 2013 to provide poverty relief across Africa, Asia, and the Middle East by offering transformative solutions to water, education, supporting orphan care and providing emergency food and medical aid.

Our charity is run by a young vibrant group of professionals, entrepreneurs and volunteers. We are passionate about the work that we do and we use our varied experience to focus on the needs of the beneficiaries.

Together, we have transformed lives and empowered communities around the world, helping to break the poverty cycle and build brighter futures.

## Our Vision

To become the warm heart for communities around the world by removing barriers and making the path easy towards livelihoods and education through long term sustainable projects.

## Our Mission

To ensure sustainability and to eliminate the high rate of poverty by empowering the poor. This is achieved by working together with communities to develop key infrastructure such as access to clean water, agriculture, healthcare and education.

We strive to provide LONG TERM SUSTAINABLE SOLUTIONS through our core focus areas:

# EMERGENCY RESPONSE

## Malawi

Since the tropical storm last year we have continued with relief efforts over the course of the year and now the recent cyclone has had some devastating effects again and so our relief work on the ground with your help is continuing to ensure we can get the people of Malawi back on their feet.

### The Impact and Benefits:

#### **1260** Food Parcels

Distributed to affected people in Mikundi, Somba, Jali Perusi and Masuku

#### **2000** Food Parcels

Distributed to affected people in Mangochi

#### **632** Food Parcels

Distributed to affected people in multiple areas

#### **90** Farmer's Packs

Packs containing seeds, fertilizer etc. to help farmers to grow crops in Mikundi

#### **50** Eid Gifts Packs

Distributed in the Mangochi area

**EMERGENCY  
RESPONSE**

# LEBANON

## RAMADHAN DISTRIBUTION

Since the arrival of storms and heavy rains in 2022, Syrian refugees across Lebanon were struggling to deal with the freezing temperatures throughout the night. The reported damage from high winds, rain and snow increased dramatically in the oncoming weeks. We were there to witness the after affects and visited the people on the ground to provide the much needed support for the Syrian refugees.

### The Impact and Benefits:

**250** Food Packs

**400** Hot Food Meals

**500** Vegetable Packs

**1800** Hot meals

**50** Eid gifts + Treats

**2** Masjid Refurbishment

**EMERGENCY  
RESPONSE**

# Bangladesh & Rohingya Camps

Since 2017, the Rohingya started fleeing the extreme violence they faced in Rakhine State, Myanmar. Since then, almost one million Rohingya refugees have arrived into Bangladesh. These people were in urgent need of shelter, food, medical care, clothes and hygiene products. The humanitarian crisis is posing a threat to people's security, safety and well-being, not only because camps are alarmingly overcrowded and difficult to access, but also due to the hazards brought by the monsoon season

What we did in the camps:

**82 Homes built**

We provided 82 families with homes, all equipped with lighting and solar energy

**30k Hot Meals served**

Distributed in many Rohingya refugee camps

**50 Eid gifts Packs**

**£500**  
Will provide ONE  
FAMILY with a  
HOME

Bangladesh (Including Floods)

**1050 Food Packs**

**422 Hygiene Kits**

**36 Survival Kits**

**1 Desalination Unit**

Provides clean and pure water to 200,000 people

# Yemen

The war in Yemen has turned a poor country into a humanitarian catastrophe. Years of persistent conflict drove Yemen to a complete economic collapse. For over 80% of the population, everyday life is a struggle for survival. With over half the country's health care facilities either damaged or completely destroyed, basic lifesaving resources are now a luxury. Currently 22 million Yemeni families lack access to food, health care and safe water and can only rely on food aid alone. This number is only set to rise.

## The Impact:

**5000+** Families benefitting

We provided bread DAILY to 4000+ families for 9 months through our bread factory. That's 30,000 people and 450,000 pieces of bread daily!

**450** Food Packs

Distributed to the poor and needy

**52** Eid Gift Packs

**YEMEN**  
**BREAD**  
**FACTORY**

A bag of 12 pieces of pita for a family costs just 8p →

**£80**

Provides  
BREAD to 1000  
FAMILIES  
DAILY

# GIVE WATER

Through our Give Water programs, we're providing clean water to impact communities in a sustainable way. So, people are able to drink, wash, clean and irrigate their crops as well as hydrate their animals. Our Give Water programs reaches communities that have never had access to clean water. This aids in the overall improvement of their health and encourages children to go to school as more time is spent in education, farming, family responsibility amongst many factors.

GIVE  
♥  
WATER

**£3,000**

Will provide clean water through a borehole for 2000 people (Malawi)

Repair a borehole for  
**£150**

# Wells & Handpumps

Providing access to clean, safe drinking water at both household and communal levels, we were able to create new jobs, encourage young women to stay in school, and ensure that children are kept healthy.

## Impact and benefits:

**35** Wells Bangladesh

Each well benefits 30 people on average.

# Boreholes

Boreholes can be drilled to provide a safe and reliable source of water for the whole community and avoid the risk of cross contamination of water borne diseases and livestock. Boreholes are safe for all community members to use, both women and children can gain easy and quick access to water, without the risk of accidents and deaths from falling into the water source. They are drilled to reach greater depths to tap into deep underground sources of water (aquifers). Hence drilled boreholes are more expensive to construct in Malawi, but the opportunities to support communities to grow with a borehole are far greater than a traditionally hand dug open well.

## The Impact:

**20** Boreholes Repaired  
Malawi

Benefitting approximately 60,000 people.  
To date built and repaired **66 Boreholes**.

**£150**

Provides CLEAN  
WATER to  
5-10 HOMES  
(Bangladesh)

# Water Irrigation (Malawi)

Water irrigation schemes supply an abundance of water to a village. This is enough to provide the foundation for the growing of staple crops, introduction of new high earning crops, fruit farms, honey farms, fish farming, cattle rearing and market days. All this can be achieved by giving them access to water. It's our flagship project as it aligns very well with our ethos of providing a long term sustainable solution.

## The Impact:

### **16** Irrigation projects

This will help support over 6500 people directly with access to water, food, income and time.

To date we have built **64 irrigation schemes**. This benefits approximately **60,000 people**. The projects are mostly located in the Southern region of Malawi.

**£35**  
Will SUSTAIN  
ONE person FOR  
LIFE

GIVE  
WATER

# Waterwheels (Malawi)

A simple, highly effective roller device to make transporting water easy. Normally, women and children carry buckets on their heads travelling considerably long distances. The water wheel is a simple, yet clever device that significantly reduces the risk of neck and spine injuries from carrying water. It has a larger water holding capacity meaning a family can source sufficient water via a single trip leaving more time for education, employment or recreation.

VE  
♥  
TER

**£40**

Will provide  
**ONE FAMILY**  
with a **WATER**  
**WHEEL**

## The Impact to Date:

**7,500** Waterwheels

This will help support over approximately 15,000 people in Malawi.

To date we have supported nearly 7500+ families. It is a Solution to the daily struggle of rural women and children across Africa to access safe, drinkable water. It really Empowers women and children!!

**“Education is the  
most powerful weapon  
we can use to change  
the world”**

*(Nelson Mandela)*

## EDUCATE A LEADER

Education is a key to development in any society as it develops the individual capacity physically, emotionally and intellectually. With this status, an individual moves positively to respond to the environment or society, assuming various roles that help develop the society even more.

# University Scholarship program

Underprivileged families either cannot afford school fees or require support from their children to earn an income, which leads to most children dropping out of school at 9 or 10 years old. Aspirations and dreams are shattered at a time when their life journey is just getting started.

On the other hand Malawi has 1 doctor for every 100,000 people, the lowest figure for any country covered by the UN's Human Development report (The College of Medicine of Malawi, 2007). This will help alleviate the shortage of medical doctors in Malawi and will also directly assist in our commitment to developing the healthcare sector.

Godfrey Kamanga Graduation

## The Impact:

### **20** Students Sponsored

Currently we are providing scholarships to 20 students who are studying Medicine, Bio-Medical Sciences and Public Health. Other students who are on our sponsoring programme are at Secondary school.

**£1,000**

Will help sponsor  
ONE STUDENT for  
1 YEAR through  
UNIVERSITY

# School Blocks Construction

Nangapoche Primary School in Somba, Malawi has 1052 learners in standards 1 up to 8, hence the need to construct a few classroom blocks to cater for standards 5 to 8 would be really beneficial. The size for this block was 26m x 10.2m which works out to approximately 265sqm. This housed 2 classrooms.

Currently we are developing two additional educational Hubs in Mikundi and Masuku where schools are over subscribed and to meet the demands we need additional space.

The communities are really keen on this expansion project and have already moulded some bricks as contribution to this initiative which will also be used as a Kitchen to provide school meals

## The Impact:

This year we have built 3 new school block in Masuku, Mikundi and Kwiputi areas. The Secondary school in Somba has started this year with its first year starting with 120 students and will be enrolling students for the next academic year where it will reach full capacity of 600 students.

## 2 School Blocks

Benefitting 400 students each year

# School Feeding Programme

We are supporting 1200+ students via this programme in Malawi, providing daily lunches on school days. We have reduced malnutrition and increased energy levels from nutritional lunches that have contributed towards improved engagement levels from students.

## The Impact:

Most of the children who may benefit from the school feeding program are from low-income earning families that can hardly manage three meals a day. Some children are orphaned of either both or one parent. Most villagers do not have formal type of employment hence depend on peasant farming activities. This feeding programme encourages kids to stay at school by preventing them from hunger.

### **1** Somba, Masuku, Mikundi,

Benefiting 1200 students each year

**£40**  
Will FEED 450  
CHILDREN one  
meal everyday

# SUSTAINABLE LIVING

At Drop of Compassion, we like to see communities become empowered so they are able to become self-sustaining and provide futures for their families and give back to their community. The following projects have shown great benefit in Malawi and work well as an extension the irrigation project.

**“A society grows great when old men plant trees whose shade they know they shall never sit in”**

*(Greek Proverb)*

## Honey Farming

Bee-keeping has a long tradition in Africa, but is not commonly practiced as a commercial activity because of the lack of resources and training.

Through bee-keeping we are able to provide an income for people who are living on average less than 60p a day. It also enables the community to preserve the forests, as trees are used for beehives. Additional income will be used for buying more beehives to enhance honey production.

### Impact in Malawi:

**400 People Benefitted**

Since inception we are benefitting 14 villages, that's 360 families. This project encourages empowering women, the elderly and orphans.

Each family can produce up to 12 litres of honey per hive annually. This honey is then sold to market or in exchange for goods e.g. vegetation, livestock.

## Goat Project

**£50**  
Will help a  
FAMILY start  
REARING  
GOATS

The Mbuzi (goat) project empowers families through women to alleviate poverty and enable self sufficiency. Goats are sustainable income sources and are low maintenance animals. They produce an average of four offspring per year which may be sold, kept for reproduction or passed on to another family.

Goats can be utilised for food, milk, materials and manure. Income generated is primarily used to purchase food, pay for school fees, medicine and clothes.

**Impact in Malawi to date:**

**900 Goats provided**

850 females and 50 males across 20 villages.  
Benefitting approximately 6000 people to date.

## Planting Fruit Trees

**£1**  
Will help GROW  
ONE FRUIT  
TREE

With one of the highest populations densities in Africa and with only 2% of the population having access to electricity, the people of Malawi are cutting trees faster than the forests can grow. They burn wood for cooking food, keeping warm etc.

**Impact in Malawi:**

**1,000+ Trees Planted**

Last year, 3,000+ Seedlings were planted in irrigation sites. Trees were also planted around schools to educate children about the natural environment and empower them with a sense of achievement as they watch these trees grow.

# HEAL HUMANITY

Health services across Malawi are either scarce or of poor standard. This leads to illnesses being treated too late to cure and, in some instances, not treated at all and leading to death. On the other hand, Malawi has serious social, economic and health problems due to inadequate financing of health services. This has led to poor standards of hygiene and spread of diseases.

“ **Malawi has 1 doctor for every 100,000 people, the lowest figure for any country** ”

*(UN's Human Development report)*

**£36**

Provides general  
TREATMENT for 20 PEOPLE  
at the HEALTH CLINIC  
and provides 2 PATIENTS  
care at the MATERNITY  
WING

**HEAL  
HUMANITY**

# Health Clinic

Access to health care facilities within Somba were scarce and over subscribed before we established the Clinic. With the nearest clinics located 30km to the west and north of the clinic. People were forced to travel long distances and against terrain that does not lend to easy travel to access basic healthcare. Over the last 8 years we have been providing free consultations and treatments. We have now expanded to running the Makanjira Clinic and Maternity Wing.

The Impact and benefits:

**7000+** People per month

The clinics support approximately 7,000 people per month across 30 villages (out of which 12% are treated for HIV and 52% are treated for Malaria).

# Maternity Wing

With health centres being distant from many villages plus local transport difficulties, many expectant mothers deliver at home or en-route to health facilities. Each year in Malawi:

- > Nearly 21,000 mothers lose their babies
- > 1,120 mothers 4,200 babies die for every 100,000 live births
- > 44% of all deliveries are outside healthcare facilities! In the UK the figure is 0.005%

The Impact and benefits:

**7800+** Beneficiaries annually

**840** Deliveries annually

On average 600-650 beneficiaries receive maternity care every month (Anti-natal, post-natal and deliveries) since we have opened a maternity wing adjacent to the existing clinic within Somba, Malawi.

# Building Homes

In Malawi, homes are usually made with mud, clay and a thatched roof, and are prone to flooding and destruction during severe weathers. We have built 16 houses this year for the vulnerable.

The Impact:

**16** Homes for families

**£2,000**

Provides a  
FAMILY with a  
HOME

**EMERGENCY  
RESPONSE**

**£75**

Will provide a  
BICYCLE to to  
a PERSON and  
FAMILY

## Bicycles

Travelling can be difficult in Malawi, to make life easier for families to shop, access medical facilities and for students to travel to school and colleges safely we have supported people with bicycles.

**322** Bikes distributed

## Daily Iftaar

In the Zomba region of Malawi Drop of Compassion was able to support 58 masajids to open their fasts.

The Impact:

**8700** people iftaar daily

Zomba Masjid with the Plateau, Malawi

## Moulana Zunayd Rahimullah

A few months ago, we lost a dear friend, brother and supporter of Drop of Compassion. Molana Zunayd Rahimahullah was a visionary and a man of great knowledge and taqwa. He was an advisor and a well wisher to Drop of Compassion. We pray that Allah swt grant him the highest abode in Jannah, Ameen.

## Pakistan Floods

Pakistan went through a tough period where 60% of the country was under water. We provided:

**400**

Food  
Packs

**90**

Tents  
provided

**50**

Survival  
Kits

**100**

Cooking  
Utensils

**1** Mobile water filtration unit

Water Filtration Plant  
in progress

**EMERGENCY  
RESPONSE**

## Afghanistan

We distributed with our partners to those most affected in Afghanistan during the hard and bitter winter.

**300**

Food  
Packs

**500**

Winter  
Packs

**250**

Shawls

**400**

Blankets

# KEEPING IT LOCAL

Drop of Compassion believes we should invest in our local community to help grow and leave a lasting legacy for our next generations to benefit.

We teamed up with Loros and Rainbows this year to offer support in religious and cultural sensitivity around death. Our team of volunteering scholars are working hard towards giving support to colleagues and families who are involved with Loros and Rainbows.

supporting  
**rainbows**  
hospice for children and young people

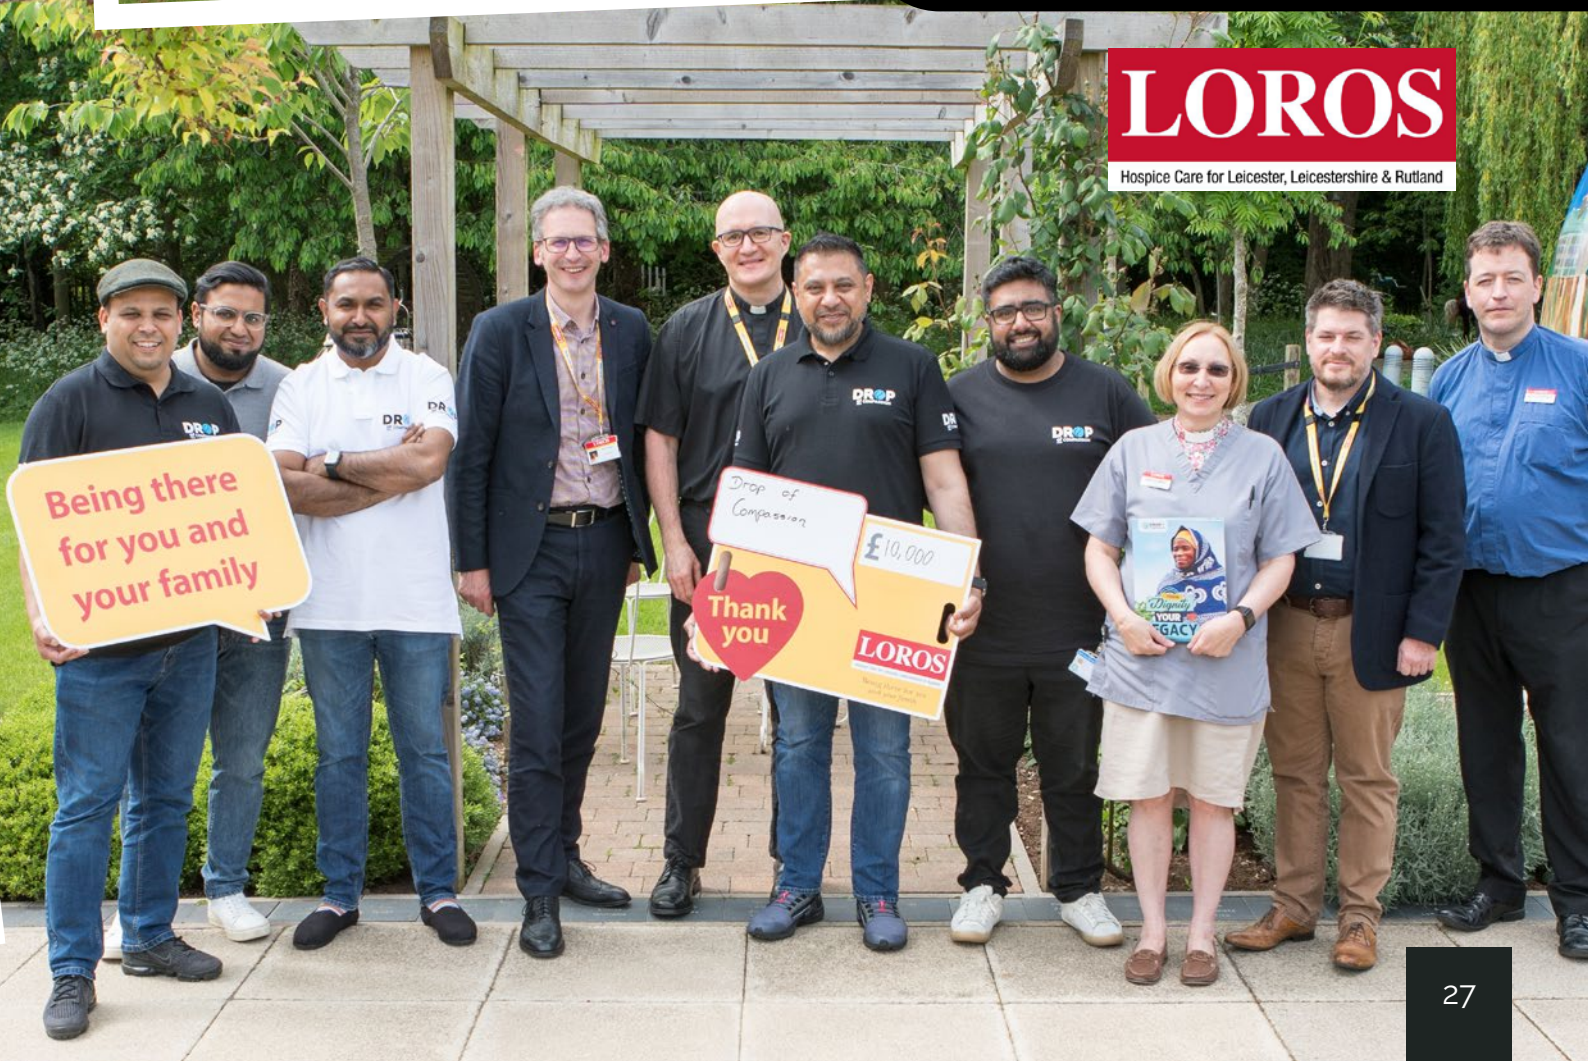

What we did:

**£20,000**

**We donated £10k to each organisation**

We supported both Rainbows and Loros with a donation of £10,000 each to help support their on-going needs for end of life care.

We also wanted to create a meaningful relationship for our communities to work together in the future.

# APPEALS

## Malawi Water irrigation projects

£35 will SUSTAIN a PERSON FOR LIFE / £250 will SUSTAIN a FAMILY  
£10,000 will SUSTAIN a VILLAGE (approx cost of full irrigation scheme)

## Malawi Health clinic • Maternity Wing

£36 provides general TREATMENT for 20 PEOPLE at the HEALTH CLINIC  
and provides 2 PATIENT CARE at the MATERNITY WING

## Malawi Drilled Water Borehole

£3,000 provides CLEAN WATER to 2000 PEOPLE

## Malawi Repair a Borehole (Maintenance)

£150 will repair a BOREHOLE to provide WATER to 2000 PEOPLE

## Malawi Waterwheel Distribution

£40 will provide a FAMILY with a WATER WHEEL

## Malawi Sustainable Living projects

£50 will help a FAMILY start REARING GOATS  
£50 will help a FAMILY to start producing HONEY  
£1 will Help GROW ONE FRUIT TREE

## Malawi Educate a leader

£1,000 will help sponsor a STUDENT for ONE YEAR AT UNIVERSITY

## Malawi School Building Construction

£24,000 will construct a SCHOOL BLOCK to help educate 200 children

## Malawi School feeding Programme

£40 will FEED 450 CHILDREN a meal everyday

## Malawi Bike Project

£75 will provide ONE BICYCLE to a FAMILY

## Malawi Build a Home

£2,000 will provide ONE HOME for a FAMILY

## Malawi Build a Masjid Complex

Price can range from £10,000 to £25,000 depending on requirements

### **Rohingya Hot Food Distribution**

£120 will provide HOT FOOD for 200 PEOPLE

### **Rohingya Building Homes**

£500 will provide ONE FAMILY with a HOME

### **Bangladesh Water Hand Pumps**

£150 provides CLEAN WATER to 30 people

### **Yemen Bread Factory**

£70 provides BREAD to 1000 FAMILIES DAILY

## **EMERGENCY APPEALS**

### **Malawi Cycloone Appeal 2023**

£25 provides a family with an EMERGENCY PACK

£2,000 will provide ONE HOME for a FAMILY

### **Turkey / Syria Earthquake Appeal**

£10 can provide a COAT AND BLANKET

£40 provides a FAMILY with CLOTHES

£60 provides a FAMILY with FOOD

£2,500 will provide ONE HOME for a FAMILY
